Background to our Business

London Forfaiting Company

London Forfaiting Company Limited (LFC), established in 1984, is a specialist provider of forfaiting and trade related financing to corporate and banking clients worldwide. Alongside core forfaiting, LFC's offering includes Credit Default Swaps, Sports & Entertainment financing, and Export Credit Agency (ECA) supported facilities.

LFC's position in the global forfaiting market is founded on enduring client relationships, a practical understanding of international trade finance, and the delivery of tailored solutions with speed and flexibility. Our professional team—drawn from commercial banking, corporate finance, and industry—works through a global office network to provide informed, bespoke support across transaction types and jurisdictions.

Forfaiting & UK Regulations

LFC is registered with the UK Financial Conduct Authority (FCA), which supervises the company's anti money laundering (AML) obligations. Under UK law, including the Banking Consolidation Directive (Annex 1, Point 2) and the Money Laundering Regulations 2017 (Schedule 1), forfaiting firms are designated non bank financial institutions and must comply with applicable AML and financial crime requirements.

Forfaiting facilitates cross border trade by enabling exporters, importers, and financial institutions to finance medium and long term receivables through the discounting of irrevocable payment obligations on a 'without recourse' basis, whether arising from export contracts or structured bilateral and syndicated loan facilities. Over time the technique has evolved to support a wide range of assignable or transferable receivables evidenced by negotiable instruments or contracts.

LFC finances a wide range of receivables, including those related to goods and services, commodities, technology, consumer and capital equipment, turnkey projects, football player transfers, and sponsorship contracts.

Traditional Forfaiting

Traditional forfaiting transactions are typically supported by an unconditional, irrevocable, and freely transferable guarantee or aval from an acceptable counterparty. Common features include:

- Major currencies exceeding USD 1,000,000
- 100% financing "without recourse" to the seller of the obligation
- Fixed or floating interest rates
- Payment guarantees from the importer's bank or a sovereign entity
- Credit periods ranging from 60 days to 10 years

Benefits of Traditional Forfaiting

Forfaiting enables exporters to enhance the competitiveness of their offerings by extending payment terms without retaining the underlying commercial or political risk. LFC assists clients in structuring export sales on credit terms while mitigating risks including commercial default, sovereign and transfer risks, interest rate exposure, and foreign exchange volatility.

By utilising forfaiting, exporters are able to realise the full value of their sales immediately upon shipment, avoiding the costs and uncertainties associated with financing overseas customers. Transactions undertaken on a "without recourse" basis ensure that exporters remain insulated from non payment under the export contract. Furthermore, forfaiting accelerates future receivable flows into immediate cash, supported by an unconditional payment obligation.

Forfaiting Assets

LFC's portfolio comprises a diverse range of forfaiting assets, evidenced through various forms of debt and receivable instruments, including:

- Bills of Exchange,
- Promissory Notes,
- Letters of Credit,
- Syndicated and bilateral loan agreements, and
- Purchase and sale contracts.

These instruments reflect LFC's commitment to delivering comprehensive financing solutions that meet evolving client needs.

Strategic Report

Principle activities

London Forfaiting Company Limited ("LFC") and its subsidiaries (collectively referred to as the "Group") specialize in forfaiting and lending services for corporate and banking clients. LFC finances international trade through purchasing bills of exchange, promissory notes, loans, deferred payment letters of credit, and other receivables. The company actively trades its forfaiting transactions with counterparty banks and financial institutions in the secondary market.

The background to these business activities is given on page 1.

Results & Performance

Market Context: The challenges in 2024 following modest growth in global goods trade were exacerbated in 2025 with the introduction of global trade tariffs, especially by nations from the developed economies. The trade tariff environment remains complex, with frequent introductions and subsequent reversals. This uncertainty has placed pressure on maintaining current trades flow volumes from both developed and emerging market economies. Global base rates have significantly decreased as a result of this uncertainty, which has impacted not only LFC, but all financial trade finance organisations. LFC will continue to navigate carefully through these challenging factors in the current economic environment.

Regulatory Developments: Financial institutions had been preparing for Basel 4 (Basel 3.1 in the UK) with the original implementation date of January 1, 2025. Whilst this date has subsequently been pushed back to January 1, 2027, many Banks and financial institutions including LFC and its parent company, FIMBank plc, have taken steps to de-risk and manage portfolio levels to comply with the upcoming regulations.

Financial Highlights:

- Profit After Tax: USD 4,773,142 (2024: USD 8,241,152), a 42% decrease.
- Trading Income: USD 31,449,559, down 17 % from USD 37,930,385 in 2024.
- Net Financing Expense: decreased by 13% to USD 15,469,210 (2024: USD 17,718,368).
- Administrative Expenses: increased by 6% to USD 9,884,848 (2024: USD 9,338,181).
- Introduction of Issued debt security of USD 96,323,676.

Trading income

Within Trading Income, LFC's Forfaiting Yield decreased by 12% to USD 27,514,576 (2024: USD 31,410,436).

Although there was a significant increase in forfaiting assets held for trading, the lower yields were driven by lower base rates during the year.

Key developments include:

- Fair Valuation Adjustments of forfaiting assets held for trading and derivative financial instruments decreased by 29% to USD 4,063,904 (2024: USD 5,743,272). During 2025, LFC recovered two forfaiting assets held for trading which were not paid at maturity. LFC's fair valuation policy resulted in marking these assets downwards significantly in 2023. The recovery in 2025, resulted in a small positive adjustment.
- Net Fees and Commission Expenses: Decreased to USD 128,921 net fee paid (2024: USD 776,677 net fee received) due to rising premiums on credit insurance.

As a result of the lower Forfaiting yield, lower fair valuation movements of forfaiting assets held for trading and lower net fees and commissions expense, Trading Income was 17% lower at USD 31,449,559 (2024: USD 37,930,385).

Strategic Report (continued)

Net financing expense

Funding support from LFC's parent, FIMBank plc included bank overdrafts and short-term promissory notes:

- Bank Overdraft: Increased by 41% to USD 93,808,713 (2024: USD 66,330,957).
- Promissory Notes Issued: Increased by 38% to USD 103,299,849 (2024: USD 74,839,119).
- External Borrowings: Increased by 35% to USD 65,950,786 (2024: USD 48,802,250).

During the year, LFC issued listed debt security of USD 96,323,676 as it took advantage of securing funding for tax efficiencies.

Lower funding rates resulted in net financing costs decreasing 13% to USD 15,469,210 (2024: USD 17,718,368), even though the overall funding total have increased as a reflection of the higher forfaiting assets held for trading during the year, further evidencing the lower base rates experienced during the year.

Administrative expenses

LFC continues to monitor and control costs while maintaining operational efficiency, consequently administrative expenses increased by a modest 6% to US\$ 9,884,848 (2024: USD 9,338,181).

Deferred Tax Asset

In view of the Company's continued profitability, the Directors again reviewed the value of the deferred tax asset against future income projections. Following this review, the Directors consider the deferred tax asset at USD 61,826, as at 31 December 2025 as appropriate and reasonable.

Financial risk management

The Group's risk management framework covers market risk, liquidity risk, credit risk, and operational risk, including compliance and reputational risk. Details are provided in Note 20 of the financial statements.

Key Performance Indicators

Throughout the year, the Directors monitor the company's KPIs. Financial KPI's including Trading Income, Administrative expenses and Net financing expense as addressed above.

An essential element in maintaining LFC's growth and market leading position is the retention of key personnel and the provision of appropriate training. Consequently, staff turnover is also considered to be a key Non-Financial KPI and is monitored closely by Directors.

Staff Turnover: 8 joiners and 8 leavers from a total staff count of 38.

Staff turnover has been noted and will continue to be monitored; however, the directors and management are comfortable with this level of turnover because this has not been in key management positions.

Strategic Report (continued)

Key risks, uncertainties, and Outlook

Credit and Interest Rate Risks: Active monitoring of forfaiting assets held for trading is required as payment delays are being experienced in certain trade finance markets.

LFC will continue to react and mitigate these risks to continue to produce a positive contribution to its shareholder. Regulatory Environment: Increased sanctions and regulations demand enhanced portfolio monitoring. Notwithstanding difficult market conditions, LFC has been able to capitalise on opportunities which have been created and continually source remunerative transactions. The forfaiting portfolio held for trading is robust and its risks continually monitored. LFC has considerable experience in managing exposures and in the close monitoring of transactions, as well as the use of various techniques to mitigate risks, to ensure ongoing positive performance. Inflation and volatile commodity pricing continue to place pressures on interest rates, although the downward trend may continue. Where appropriate LFC employs economic hedging techniques and derivatives to minimise exposure to interest rate risks.

Funding is secured from our own capital, our ability to attract external funding, and financing we receive from our immediate parent, related parties and/or our ultimate owners, Kuwait Projects Company (Holding) K.S.C.P. (KIPCO). During 2025, LFC issued two debt securities of a total of USD 96,323,676, with the reason being for tax efficiency.

Mitigation Strategies:

- Leveraging extensive experience in transaction monitoring.
- Employing economic hedging techniques to manage interest rate risks.
- Ensuring robust funding from internal and external sources.

Looking ahead, interest rates are expected to decrease and whilst the rate of this decrease is uncertain, it does provide a more favourable trading environment. However, replacing any assets traded at similar rates would then be the challenge.

Going concern

The directors have made an assessment in preparing these financial statement as to whether the Group is a going concern, covering a period of at least 12 months from the date of approval of these financial statements. The Group is expected to generate positive cashflows and in view of the current market conditions, the directors have considered existing and future funding lines, a range of stressed scenarios, as well as the tradability of the forfaiting assets held for trading and are satisfied about the Group and Company's ability to meet obligations as they fall due. The shareholder has continued to provide its support through the bank overdraft facility and loans and confirmed its availability for at least one year after these financial statements are signed. Despite a year of lower profitability, the positive contribution in the year is testament to the good risk management and business generation of LFC.

The directors have also considered a severe but plausible downside scenario and still confirm that the use of the going concern basis of accounting is appropriate because there are no material uncertainties related to events or conditions that may cast significant doubt about the ability of the Company to continue as a going concern. Both the Company financial statements and the Group financial statements have been prepared on a going concern basis.

Directors and Staff

We extend our gratitude to management and staff for their dedication and contributions throughout the year. We also thank our shareholders for their continued support and commitment to LFC's business activities.

The strategic report on pages 2 to 4 were approved by the Board of Directors on 13 March 2026 and signed on its behalf by

Simon Lay
Chief Executive Officer/ Director

Section 172 Statement

Overview

In overseeing delivery of LFC's purpose and strategy, the directors are always mindful of their duties under the Companies Act 2006, including as set out in section 172. The Board recognises that LFC's long-term success is only possible through engagement with, and having regard to, the interests of key stakeholders, which for LFC includes our shareholder, customers and counterparties, employees, and wider communities.

LFC's governance framework seeks to ensure that the Board appropriately considers stakeholder considerations in decision making. The proactive oversight and challenge provided by the Board is central to the ongoing development and execution of LFC's purpose and strategy.

LFC's shareholder, FIMBank plc

Given FIMBank plc's 100% ownership of LFC, it is natural that the promotion of the long-term success of LFC, through the development of a clear purpose and strategy, is aligned with the interests of FIMBank plc. FIMBank plc's interests are represented at Board by four shareholder appointed Non-executive Directors. Any circumstances where shareholder and LFC's interests are not aligned are managed through the disclosure and management of any such potential conflict. FIMBank plc's interests are further represented through the Board Risk Committee, where all members are FIMBank plc directors.

Customers and Counterparties

The Board takes account of client interests through regular updates from management reviews of the business conducted by the company, the type of client it deals with and the products delivered to those clients. LFC's business model is focused on incorporated entities and financial institutions; consequently, key scorecard measures such as customer conduct metrics assessment of vulnerable customers are not required.

The interests of clients, particularly where difficulties were experienced in meeting loan repayments or other obligations, have been fully considered.

The Board also fully recognises its obligations to consider the interests of the wider communities in which LFC operates and has entrusted LFC Management with delivering support it considers appropriate.

Employees

The Board operates a framework that takes account of the interests of our employees, including a remuneration policy that is appropriate for all employees, as well as executives, and provides for competitive remuneration strongly aligned to the delivery of LFC's strategic goals; and undertaking semi-annual reviews of talent and succession.

Section 172 Statement (continued)

Wider communities

At Board level, Society and the Community is a core pillar of the LFC's strategy and firmly embedded in the culture of the Company. The events of 2025, including the significant push towards sustainability and environmental responsibility, the proactive role of businesses in community engagement, and the rising political and economic uncertainties, have reinforced the expectations of society on businesses to contribute positively and more widely in the communities in which they operate. Given its origins, LFC has always taken its role in society seriously and sets out a clear framework of actions aligned to LFC's purpose and strategy that are intended to meet the expectations of stakeholders so that LFC contributes fully to the communities in which it operates.

Looking ahead to 2026 and beyond, LFC remains committed to reducing its impact on the environment while helping customers and employees do the same. The company will continue to innovate and implement sustainable practices, ensuring that its operations are environmentally responsible and that it actively supports the communities it serves.

Other non-financial disclosures

LFC has a moral, legal and regulatory duty to prevent, detect and deter financial crime and maintains a financial crime framework. This framework is supported and reinforced by LFC's systems and behaviours which put clients at the heart of every interaction. LFC promotes an environment which is hostile to illicit activity to protect its clients, employees, and communities from financial crime, and continues to invest in further system control enhancements. LFC's compliance with requirements of the financial crime framework is monitored through ongoing control testing, assurance, audit, and the provision of management information at LFC Board meetings.

In 2026, LFC will continue to strengthen its financial crime framework, ensuring that it remains robust and effective in the face of evolving threats. The company is dedicated to fostering a culture of integrity and transparency and will persist in its efforts to safeguard its stakeholders from financial crime.

LFC's Modern Slavery Statement (which is available on our website) sets out the policies we apply and actions we take to ensure that our employees and customers are treated with dignity and respect. This includes raising awareness of issues that could put our customers at risk such as vulnerability and exploitation.

John C. Grech
Chairman
13 March 2026

Simon Lay
Chief Executive Officer/ Director

Directors' report

The Directors are pleased to present their report and the audited Group and Company financial statements for the year ended 31 December 2025.

Results and dividends

LFC's profit after tax for the year 2025 was USD 4,773,142 (2024: USD 8,241,152). There was no cash or scrip dividend paid in 2025.

Key Performance Indicators

The company's Key Performance Indicators (KPI's) are detailed on page 3.

Financial risk management

The financial risk management objectives and policies and exposures to various risks, including market risk, liquidity risk, credit risk and operational risk (which include compliance and reputational risk) are covered in note 20 of the financial statements.

Political contributions

The Group and Company made no political contributions in 2025, (2024: nil)

Directors

The directors who were in office during the year and up to the date of signing the financial statements were as follows:

Chairman/ Director – John Carmel Grech	Director / CEO – Simon Lay
Director – Hussain Abdul Aziz Lalani	Director – Samer Abbouchi
Director – Teuta Bakalli	

None of the Directors who held office at the end of the financial year had any disclosable interest in the shares of the company. According to the register of directors' interests, no right to subscribe for shares in or debentures of the company were granted to any of the directors or their immediate families, or exercised by them, during the financial year. The Directors benefited from qualifying third party indemnity provisions during the financial year and also at the date of the approval.

Post balance sheet events

The directors confirm that there were no subsequent events that affect Group and Company financial statements for the year ended 31 December 2025.

Disclosure of information to Auditors

The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's Auditors are unaware; and each director has taken all the steps that he/she ought to have taken as a director to make himself/herself aware of any relevant audit information and to establish that the Company's Auditors are aware of that information.

Auditors

Pursuant to Section 487 of the Companies Act 2006, the Auditors will be deemed to be reappointed and PwC LLP will therefore continue in office.

Approval & Signature

By order of the Board.

John C. Grech

Director

13 March 2026

15-18 Austin Friars

London, EC2N 2HE

Statement of directors' responsibilities in respect of the financial statements

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the group and the company financial statements in accordance with UK-adopted international accounting standards.

Under company law, directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and company and of the profit or loss of the group and company for that period. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable UK-adopted international accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the group and company will continue in business.

The directors are responsible for safeguarding the assets of the group and company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are also responsible for keeping adequate accounting records that are sufficient to show and explain the group's and company's transactions and disclose with reasonable accuracy at any time the financial position of the group and company and enable them to ensure that the financial statements comply with the Companies Act 2006.

The directors are responsible for the maintenance and integrity of the company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Directors' confirmations

In the case of each director in office at the date the directors' report is approved:

- so far as the director is aware, there is no relevant audit information of which the group's and company's auditors are unaware; and
- they have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the group's and company's auditors are aware of that information.

Independent auditors' report to the members of London Forfaiting Company Limited

Report on the audit of the financial statements

Opinion

In our opinion, London Forfaiting Company Limited's group financial statements and company financial statements (the "financial statements"):

- give a true and fair view of the state of the group's and of the company's affairs as at 31 December 2025 and of the group's and company's profit and the group's and company's cash flows for the year then ended;
- have been properly prepared in accordance with UK-adopted international accounting standards; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report, which comprise:

- the Group and Company Statements of financial position as at 31 December 2025;
- the Group and Company Statements of changes in equity as at 31 December 2025;
- the Group and Company Income statements for the year then ended;
- the Group and Company Statements of comprehensive income for the year then ended;
- the Group and Company Statements of cash flows for the year then ended; and
- the notes to the financial statements, comprising material accounting policy information and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Our audit approach

Overview

Audit scope

- The scope of the audit and the nature, timing and extent of audit procedures were determined with consideration of our risk assessment, the financial significance of account balances and other qualitative factors.

Key audit matters

- Valuation of forfeiting assets held for trading (group)

Materiality

- Overall group materiality: \$2.1m (2024: \$2.0m) based on 2.5% of net assets.
- Overall company materiality: \$2.1m (2024: \$2.0m) based on 2.5% of net assets.
- Performance materiality: \$1.6m (2024: \$1.5m) (group) and \$1.6m (2024: \$1.5m) (company).

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

As a result of the group issuing debt securities on The International Stock Exchange transitioning from its previous status as an unlisted entity to a listed entity under the standards set forth by the International Auditing and Assurance Standards Board (IAASB), key audit matters have been included for the first time this year.

This is not a complete list of all risks identified by our audit.

Key audit matter	How our audit addressed the key audit matter
<i>Valuation of forfeiting assets held for trading (group)</i> The Group holds forfeiting assets that are measured at fair value through profit or loss. These assets are not quoted in an established market.	We evaluated the design and implementation of key controls related to the determination of fair value of forfeiting assets held for trading.

<p>Refer to Note 19 of the financial statements.</p> <p>The fair valuation of trading assets is determined through the application of an internally developed valuation model that involves the exercise of judgement and the use of assumptions based on limited observable market data.</p> <p>Key inputs used in the valuation methodology to discount expected future cash flows comprise:</p> <ul style="list-style-type: none"> • instrument specific characteristics used to determine credit spreads, including counterparty creditworthiness and transaction currency; and • market risk-free rates determined by reference to contractual terms as well as interest rates observed in the market at reporting date. <p>The Group's trading assets are classified as Level 3 financial instruments in the fair value hierarchy given that their fair value is determined by reference to significant unobservable inputs.</p> <p>Due to the judgement involved in determining the valuation of these financial instruments, the valuation of trading assets is considered a key audit matter.</p>	<p>We understood and assessed the appropriateness of the methodology used to determine the fair value of forfeiting assets held for trading.</p> <p>We tested the accuracy of inputs used in the discounted cash flow model at reporting date for a sample of assets by agreeing key inputs to contractual agreements.</p> <p>We performed a roll forward test to gain comfort over completeness and mathematical accuracy of the adjustments that form components of the final valuation for a sample.</p> <p>We engaged our internal PwC valuation experts to assess the reasonableness of discount rates applied in the internally developed discounted cash flow model. This model is used to determine the fair value of trading assets at the reporting date. Specifically:</p> <ul style="list-style-type: none"> • assessed whether the instrument specific credit spreads were within an appropriate range by reference to movements in instrument-specific external ratings (where available) and country external ratings on a sample basis; and • tested the appropriateness of market risk-free rates applied by the Group for the determination of discount rates to be used for the fair valuation of trading assets at reporting date across the portfolio. <p>We also reviewed the appropriateness of the disclosures in respect of fair values of the forfeiting assets held for trading in accordance with the requirements of IFRS 13.</p>
--	--

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the group and the company, the accounting processes and controls, and the industry in which they operate.

The scope of our audit and the nature, timing and extent of audit procedures performed were determined by our risk assessment. The only significant component for the group audit was determined to be London Forfeiting Company Ltd, the parent entity. We performed audit procedures over parent entity's relevant business activities, using the materiality levels set out below.

The impact of climate risk on our audit

As part of our audit we made enquiries of management to understand the extent of the potential impact of climate risk on the group's and company's financial statements, and we remained alert when performing our audit procedures for any indicators of the impact of climate risk. Our procedures did not identify any material impact as a result of climate risk on the group's and company's financial statements.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

	Financial statements - group	Financial statements - company
Overall materiality	\$2.1m (2024: \$2.0m).	\$2.1m (2024: \$2.0m).
How we determined it	2.5% of net assets	2.5% of net assets
Rationale for benchmark applied	We consider net assets an appropriate benchmark due to its significance to the primary users of the financial statements, specifically the immediate parent entity. Being a regulated bank, the parent places emphasis on regulatory capital management, where net assets serve as a suitable proxy.	We consider net assets an appropriate benchmark due to its significance to the primary users of the financial statements, specifically the immediate parent entity. Being a regulated bank, the parent places emphasis on regulatory capital management, where net assets serve as a suitable proxy.

For the single significant component in the scope of our group audit, we allocated a materiality that is less than our overall group materiality. The materiality allocated to the single significant component was \$2.1m.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% (2024: 75%) of overall materiality, amounting to \$1.6m (2024: \$1.5m) for the group financial statements and \$1.6m (2024: \$1.5m) for the company financial statements.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with those charged with governance that we would report to them misstatements identified during our audit above \$0.21m (group audit) (2024: \$0.20m) and \$0.21m (company audit) (2024: \$0.20m) as well as misstatements below those amounts that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

Our evaluation of the directors' assessment of the group's and the company's ability to continue to adopt the going concern basis of accounting included:

- obtaining and evaluating management's going concern assessment;
- understanding and evaluating management's consideration of funding and liquidity position over the going concern period and an evaluation of the stress testing performed by management;
- assessing the regulatory liquidity position of the immediate parent bank to support the provision of sustainable funding to Group and Company;
- reviewing significant contracts for funding facility agreements and substantiating the financial resources available to the Group and Company as at the balance sheet date;

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group's and the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the group's and the company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic report and Directors' report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on our work undertaken in the course of the audit, the Companies Act 2006 requires us also to report certain opinions and matters as described below.

Strategic report and Directors' report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic report and Directors' report for the year ended 31 December 2025 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the group and company and their environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic report and Directors' report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities in respect of the financial statements, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities,

including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the group and industry, we identified that the principal risks of non-compliance with laws and regulations related to Companies Act 2006 and UK tax legislation, and we considered the extent to which non-compliance might have a material effect on the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting of inappropriate manual journal entries and management bias in significant accounting estimates. Audit procedures performed by the engagement team included:

- Challenging assumptions and judgements made by management in their significant accounting estimates, specifically those related to the valuation of forfeiting assets
- Identifying and testing a sample of manual journal entries that met defined fraud risk criteria
- Designing audit procedures to incorporate an element of unpredictability into the nature, timing and/or extent of our testing; and
- Review of board meeting minutes.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the company financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

The notes on pages 22 to 53 are an integral part of these financial statements.

Notes to the financial statements

1. Reporting entity

London Forfaiting Company Limited (the “Company”) is a private limited company incorporated and domiciled in the United Kingdom. The address of the Company’s registered office is 15-18 Austin Friars, London EC2N 2HE. The financial statements of the Company for the year ended 31 December 2025 comprises the Company and its subsidiaries (together referred to as the “Group” and individually as “Group entities”). The Group is primarily involved in forfaiting, a further background to our business is shown on page 1.

2. Basis of preparation

The Group’s business activities, together with the factors likely to affect its future development, performance and position are set out in the Strategic Report on pages 2 to 4.

The directors have made an assessment in preparing these financial statement as to whether the group is a going concern, covering a period of at least 12 months from the date of approval of these financial statements. The Group is expected to generate positive cashflows and in view of the current market conditions, the directors have considered existing and future funding lines, a range of stressed scenarios, as well as the tradability of the forfaiting assets held for trading and are satisfied about the Group and Company’s ability to meet obligations as they fall due. The shareholder has continued to provide its support through the bank overdraft facility and confirmed its availability for at least one year after these financial statements are signed.

The directors have considered a severe but plausible downside scenario and still confirm the use of the going concern basis of accounting is appropriate because there are no material uncertainties related to events or conditions that may cast significant doubt about the ability of the Company to continue as a going concern. Both the Company financial statements and the Group financial statements have been prepared on a going concern basis.

(a) Statement of compliance

Both the parent company financial statements and the Group financial statements have been prepared and approved by the directors in accordance with UK-adopted International Accounting Standards (“UK-adopted IFRS”) and with the requirements of the Companies Act 2006 as applicable to companies reporting under those standards.

The financial statements were authorised for issue by the Board of Directors on 13 March 2026.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following items in the statements of financial position:

- forfaiting assets held for trading are measured at fair value; and;
- derivative financial instruments are measured at fair value

(c) Functional and presentation currency

These financial statements are presented in United States Dollars (USD), which is the Company’s functional currency.

(d) Use of estimates and judgements

The preparation of the financial statements in conformity with UK - adopted IFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment is set out in note 19, Fair value of financial instruments: the determination of the fair value of financial instruments with significant unobservable inputs.

Notes to the financial statements (continued)

(d) Use of estimates and judgements - continued

3. Material accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements and have been applied consistently by Group entities.

(a) Basis of consolidation - subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

(b) Foreign currency

(i) Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign exchange differences arising on translation are recognised in the income statement.

(ii) Foreign operations

The assets and liabilities of foreign operations are translated to US Dollars at exchange rates at the reporting date. The income and expenses of foreign operations are translated to the US Dollar at the exchange rates at the dates of the transactions.

(c) Forfaiting assets held for trading

(i) Recognition and initial measurement

The Group initially recognises forfaiting assets held for trading (comprising bills of exchange, promissory notes and transferable trade related loans) as financial instruments held for trading. They are recognised on the trade date, which is the date on which the Group becomes a party to the contractual provisions of the financial instrument. They are stated at fair value, which is generally its transaction price with any resulting gain or loss recognised in the income statement. Fair value is calculated using the credit worthiness, tenor, amount and interest rates on each asset at the reporting date and determining whether or not it is higher or lower than the book value, with the resulting gain or loss taken to the income statement; this is further explained in Note 19.

(ii) Classification

Having assessed the business model requirements under IFRS9, this forfaiting assets portfolio was classified as held for trading. This means that the instruments will be held at Fair Value through Profit and Loss.

(iii) Derecognition

The Group derecognises a forfaiting asset held for trading when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

Notes to the financial statements (continued)

3. Material accounting policies (continued)

(c) Forfaiting assets held for trading (continued)

(iv) Forfaiting assets write off

The Group writes off a forfaiting asset held for trading when it has been determined that the asset is uncollectible. This determination is reached after considering information such as the occurrence of significant changes in the borrower/ guarantor's financial position such that the borrower/ guarantor can no longer pay the obligation that proceeds from collateral will not be sufficient to pay back the entire exposure, or future recoverability efforts are deemed unfeasible.

(d) Derivative financial instruments

The Group from time to time uses derivative financial instruments to hedge its exposure to interest rate risks arising from operational activities, however, the Group does not hold or issue derivative financial instruments for trading purposes. Derivative financial instruments are recognised initially at fair value. Subsequent to initial recognition, derivative financial instruments are stated at fair value. The gain or loss on re-measurement to fair value is recognised immediately to the income statements. The fair value of interest rate future contracts is the estimated amount that the Group would receive or pay to terminate the contract at the reporting date, taking into account current interest rates.

(e) Plant and equipment

(i) Recognition and measurement

Items of plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of plant or equipment have different useful lives, they are accounted for as separate items (major components) of plant and equipment.

The gain or loss on disposal of an item of plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of the item of property and equipment and are recognised as other operating expenses in profit or loss.

(ii) Subsequent costs

The cost of replacing a component of an item of plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied with the component will flow to the Group and its cost can be measured reliably. The carrying amount of the replaced component is derecognised. The costs of the day-to-day servicing of plant and equipment are recognised in the income statement as incurred.

(iii) Depreciation

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of plant and equipment since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets under finance leases are depreciated over the lease term and their useful lives. The estimated useful lives are as follows:

- | | |
|------------------------------------|---------|
| • buildings | 5 years |
| • leasehold improvement | 5 years |
| • fixtures, fittings and equipment | 4 years |
| • motor vehicles | 4 years |

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

Notes to the financial statements (continued)

3. Material accounting policies (continued)

(f) Investments in subsidiaries

Investments in subsidiaries are measured at cost in accordance with the requirement of IAS 27 and tested for impairment annually.

(g) Trade and other receivables

These financial assets meet the criteria of amortised cost under IFRS9, with solely payment of principal and interest being receivable. As such these instruments are stated at amortised cost under IFRS9. Expected Credit Losses are expected as per the staging criteria set out in accounting policy (i).

(h) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand form an integral part of the Group's and Company's cash management are included as a component of cash and cash equivalents for the purpose only of the statement of cash flows. These financial assets meet the criteria of amortised cost under IFRS 9, with solely payment of principal and interest being receivable. As such these instruments are stated at amortised cost under IFRS 9. Expected Credit Losses are expected as per the staging criteria set out in accounting policy (i).

(i) Impairment

The Company recognises loss allowances for expected credit losses (ECLs) on financial assets measured at amortised cost, debt investments measured at FVOCI and contract assets (as defined in IFRS 15).

The Company measures loss allowances at an amount equal to lifetime ECL, except for other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition which are measured as 12-month ECL.

Loss allowances for trade receivables and contract assets are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The financial assets held at amortised costs consists of trade and other receivables and cash and cash equivalents.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Notes to the financial statements (continued)

3. Material accounting policies (continued)

(i) Impairment (continued)

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Write-offs

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery.

Impairment of non-financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount.

(j) Interest-bearing borrowings

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the income statement over the period of the borrowings on an effective interest basis.

(k) Employee benefits

The Group contributes towards defined contribution plans. A defined contribution plan is a post-employment benefit plan under which the Group pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement in the periods during which services are rendered by employees. The Group also provides short term benefits. Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(l) Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

(m) Trade and other payables

Trade and other payables are stated at amortised cost.

Notes to the financial statements (continued)

3. Material accounting policies (continued)

(n) Trading income

Trading income is analysed in note 4 to the financial statements. This represents the net amount earned from forfeiting yield and fair value adjustments and net fees and commissions' income.

Forfeiting yield is the realised and accrued interest earned from forfeiting assets held for trading up to sale or maturity.

Fair valuation of forfeiting assets held for trading and derivative financial instruments is the summation of realised and unrealised upward and downward fair value movements as well as recoveries from written off assets (if any).

Fair value of forfeiting assets held for trading is calculated using the credit worthiness, amount, tenor and interest rates on each asset at the reporting date and determining whether or not it is higher or lower than the book value, with the resulting profit or loss taken to the income statement.

The Group earns fees and commissions income from the provision of financial services to its customers. These fees are recognised when the Group satisfies the performance obligation of the contract with the customer. The fees and commissions income include fees for business introductions, Proex financing, whilst the fees and commissions expense include nostro maintenance fees and fees payable for insurance.

The Group has entered into future contracts to hedge its interest rate exposure. Any gains and losses made under these derivative financial instruments are included within trading income. This is an economic hedge and LFC has not applied hedge accounting requirements.

(o) Net finance costs

Net finance costs comprise interest payable and foreign exchange gains and losses.

Interest income and interest payable is recognised in the income statement as it accrues, using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than purchased or originated credit-impaired assets, the Group estimates future cash flows considering all contractual terms of the financial instrument, but not ECL. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using the estimated future cash flows including ECL.

The calculation of the effective interest rate includes transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

(p) Leases

At the inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee

At commencement or on modification of a contract that contains a lease component, along with one or more other lease or non-lease components, the Group accounts for each lease component separately from the non-lease components. The Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone price and the aggregate stand-alone price of the non-lease components.

Notes to the financial statements (continued)

3. Material accounting policies (continued)

(p) Leases (continued)

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date
- amounts expected to be payable under a residual value guarantee; and
- lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and
- penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, to the extent that the right-of-use asset is reduced to nil, with any further adjustment required from the remeasurement being recorded in profit or loss.

The Group presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'Lease Liabilities' in the statement of financial position.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for lease of low-value assets and short-term leases. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

As a lessor

The Group and Company are not lessors.

Lease acquired in a business combination

The Group and Company have not acquired any leases in a business combination during the year.

Government grants

The Group and Company has not applied for any Government grant.

Notes to the financial statements (continued)

3. Material accounting policies (continued)

(q) Taxation

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity. Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of goodwill; the initial recognition of assets or liabilities that affect neither accounting nor taxable profit other than in a business combination, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary difference, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(r) Segment Reporting

The Group is not required to adopt IFRS 8 Operating Segment reporting as the Group has only one reportable segment. All trading income and profits before taxation are derived from the Group's sole activity of international trade finance focusing on forfaiting and loans. As trading is carried out in international markets, it is not viewed to be contained by geographical boundaries. Furthermore, the forfaiting assets held for trading are diverse and as a consequence segmenting into specific countries or regions would not be meaningful over time as there is no comparability.

(s) Sale and repurchase agreements

When forfaiting assets held for trading are sold subject to a commitment to repurchase them at a predetermined price (repos), they remain on the balance sheet as, in substance, these transactions are in the nature of secured borrowings. As a result of these transactions, the Company is unable to use, sell or pledge the transferred assets for the duration of the transaction. Similarly, forfaiting assets held for trading purchased under commitments to sell ('reverse repos') are not recognised on the balance sheet.

(t) Intra-group financial instruments

Where the Group and/or Company enters into financial guarantee contracts to guarantee the indebtedness of other companies within its group, the Group and/or Company considers these to be insurance arrangements and accounts for them as such. In this respect, the Group/ Company treats the guarantee contract as a contingent liability until such time as it becomes probable that the company will be required to make a payment under the guarantee.

As at 31 December 2025, there are no intra-group guarantees, (2024: nil).

Notes to the financial statements (continued)

3. Material accounting policies (continued)

(u) Forfaiting asset insurance

LFC takes out third party insurance against certain loans. The costs of these policies are taken into fees and commissions expense. Any potential income associated to the policy is not recognised until it is virtually certain that the policy will pay out to LFC.

(v) Changes in material accounting policies

The Group and Company have no transactions that are affected by effective requirements.

(w) New standards and interpretations not yet adopted

Other standards

Certain new accounting standards, amendments to accounting standards and interpretations have been published that are not mandatory for 31 December 2025 reporting periods and have not been early adopted by the company. Their adoption is not expected to have a material effect on the financial statements:

- Amendment to the Classification and Measurement of Financial instruments – Amendments to IFRS 9 and IFRS 7
- IFRS 18, Presentation and Disclosure in Financial Statements
- IFRS 19, Subsidiaries without Public Accountability

4. Trading income

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Net gain on financial instruments held for trading:				
Forfaiting yield	27,514,576	31,410,436	27,514,576	31,410,436
Fair valuation of forfaiting assets held for trading and derivative financial instruments	4,063,904	5,743,272	4,063,904	5,743,272
	31,578,480	37,153,708	31,578,480	37,153,708
Fees and commissions income	1,210,405	1,784,472	1,210,405	1,784,472
Fees and commissions expenses	(1,339,326)	(1,007,795)	(2,232,062)	(2,551,644)
	31,449,559	37,930,385	30,556,823	36,386,536

Included within the Company's fees and commissions expense is an amount of USD 895,022 (2024: USD 1,545,673) payable to subsidiaries for marketing services.

Notes to the financial statements (continued)

5. Administrative expenses

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Staff cost				
Wages and salaries	4,973,094	4,876,952	4,422,558	4,159,347
Social security costs	724,145	784,785	523,134	581,620
Other pension costs	166,826	163,986	153,648	142,410
Operating lease expenses	290,025	297,684	285,437	291,259
Audit fee for the statutory audit	491,119	420,432	491,119	420,432
Other professional fees	223,593	181,124	214,388	170,585
Depreciation	395,661	466,436	268,794	340,273
Consultancy fees	546,938	489,912	546,938	489,912
Management fee paid to ultimate parent	236,848	157,893	236,848	157,893
Other administrative expenses	1,836,599	1,498,977	1,950,068	1,574,409
	9,884,848	9,338,181	9,092,932	8,328,139

Pension cost represents contribution payable by the Group to a defined contribution pension scheme.

The management fee paid to ultimate parent is for services incurred at the parent on behalf of the Group and Company.

	Group		Company	
	2025	2024	2025	2024
Average monthly number of employees at the end of the year:				
- forfaiting and loan officers	13	13	10	10
- other staff	24	26	24	24
	37	39	34	34

As at 31 December 2025, there were 3 employees in London Forfaiting Americas Inc. (2024: 3 employees) and 1 in London Forfaiting do Brasil Ltda. (2024: 1 employee).

6. Other operating income

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD

London Forfaiting International Limited	Holding company	15-18 Austin Friars London EC2N 2HE	Great Britain	USD 1,000	100%	100%
London Forfaiting Americas Inc.*	Marketing	444 Madison Ave, Ste 36A, New York, NY 10022,	United States of America	USD 4,669,420	100%	100%
London Forfaiting do Brasil Ltda.*	Marketing	Av. das Nacoes Unidas, 14171 - 15° andar Rochavera Corporate Tower - TORRE B, São Paulo - SP, 04794-000,	Brazil	BRL 4,045,656	100%	100%

* A wholly owned subsidiary of London Forfaiting International Limited.

During 2025, London Forfaiting International Limited increased its investment in London Forfaiting Americas Inc. by USD 4,419,420

11. Deferred tax assets / liabilities

Group and Company

Recognised deferred tax assets

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Tax value of loss carry-forwards Recognised	61,826	26,275	40,723	-

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Deferred tax asset brought forward Recognised	26,275	31,436	-	2,619
Utilised	(5,172)	(5,161)	-	(2,619)
Balance at 31 December	61,826	26,275	40,723	-

Recognition of the above deferred tax assets is based on IAS12 Amendments. Historic recognition of the above deferred tax assets is based on management's five-year profit forecasts (2024: 5 years). It is based on available evidence, including historical levels of profitability and reasonable assumptions, which indicates that it is probable that the Company will have future taxable profits against which these assets can be used. All tax losses have been recognised through the deferred tax asset of USD nil (2024: USD nil).

Recognised deferred tax liabilities

The balances comprises temporary differences attributable to Right-of-use assets

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Right-of-use assets	-	13,371	-	13,371
Balance at 31 December	-	13,371	-	13,371

Notes to the financial statements (continued)

12. Trade and other receivables

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Pre-payments and accrued income	1,495,586	1,192,944	1,397,723	1,108,433
Other debtors	291,871	232,920	285,058	226,415
	1,787,457	1,425,864	1,682,781	1,334,848

These receivables are unsecured and have no fixed date for repayment; however, are considered repayable on demand.

13. Cash and cash equivalents

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Cash at banks	1,984,302	731,806	1,955,654	684,454
Cash in hand	25,145	12,927	25,145	12,927
Cash at banks and in hand	2,009,447	744,733	1,980,799	697,381

All balances have a remaining period to maturity of less than three months.

Bank overdraft (Group and Company)

The overdraft facility, from the parent company, is the equivalent of USD 220 million (2024: USD 220 million). This facility is made available in USD, GBP, EUR, JPY and AED and is unsecured. The amount of USD 93,808,713 was drawn on the facility on the 31 December 2025 (2024: USD 66,330,957).

14. Issued promissory notes to parent

During the year, the Group and Company issued promissory notes to the parent, evidencing short term financing

Group and Company	2025 USD	2024 USD
As at 1 January	74,839,119	69,347,147
Issued	358,098,995	369,970,127
Repaid	(329,638,265)	(364,478,155)
Balance at 31 December	103,299,849	74,839,119

All issued promissory notes have a maturity of less than 6 months (2024: less than 6 months)

15. Issued debt securities

During the year, the Group and Company issued debt securities

Group and Company	2025 USD	2024 USD
As at 1 January	-	-
Issued	96,323,676	-
Balance at 31 December	96,323,676	-

The debt security has a maturity date of 27 October 2026.

Notes to the financial statements (continued)

16. Loans and borrowings Group and Company

	2025 USD	2024 USD
Issued promissory notes	17,782,045	15,851,701
Money market loans	48,168,741	32,950,549
Other borrowings	65,950,786	48,802,250

There are two Money market loans with Tunis International Bank totalling USD 20,120,042 as at 31 December 2025, (2024: USD nil); USD 10,107,292 maturing 15 January 2026 and USD 10,012,750 maturing 20 March 2026.

17. Share capital

	2025 USD	2024 USD
In issue at 31 December – fully paid	75,600,000	75,600,000

At 31 December 2025, the paid share capital comprised of 75,600,000 shares (2024: 75,600,000). The Company did not pay a cash or scrip dividend in 2025 (2024: USD 6,000,000 cash dividend).

18. Trade and other payables

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Amounts due to parent	445,202	295,402	445,202	295,402
Amounts due to group undertakings	-	-	72,738	-
Accruals and deferred income	3,992,679	5,444,369	3,919,683	5,387,752
Cash collateral	-	4,054	-	4,054
	4,437,881	5,743,825	4,437,623	5,687,208

Included in accruals and deferred income is USD 0.8m (2024: USD 0.8m) of fees received on trades entered into where the company has a continued involvement. Continued involvement includes annual reviews in which additional charges may be incurred and amounts may be repaid. As at 31 December 2025, the continued involvement is expected to be 10 years due to the tenure of the trade. The amount represents management's best estimate of the future payables.

Amounts due to parent yield no interest. These payables are unsecured and have no fixed date for repayment. Within amounts due to parent is USD 2,126 (2024: USD 56,064) relating to interest rate futures which the parent manages on behalf of the Group and Company.

Notes to the financial statements (continued)

19. Fair values of financial instruments

Fair values

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the measurement date.

The carrying amounts of the Group and Company's assets and liabilities, including those at the reporting date approximate their fair values. The following summarises the major methods and assumptions used in estimating the fair values of financial instruments at the reporting date.

The Group measures fair value using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1: inputs are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2: inputs other than quoted prices within Level 1 that are observable either directly (i.e. prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.
- Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Forfeiting assets held for trading

All forfeiting assets held for trading are reported at their fair value at the reporting date.

When available, the Group measure the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily and regularly available and represent actual and regular occurring market transactions on an arm's length basis. However, forfeiting assets are not actively traded with quoted prices. Accordingly, the Group establishes fair value using a valuation model. On each and every forfeiting asset held for trading and at the reporting date, management assess the following characteristics

- Counterparty credit worthiness,
- Transaction size,
- Transaction currency,
- Transaction type,
- Repayment profile
- Contractual and current interest rates

to discount expected future principal and interest cash flows, with the resulting gain or loss taken to the income statement. The discount rate is an estimate based on current expected credit margin spreads and market interest rates at the reporting date. Inputs to the valuation technique reasonably represent market expectation and measures of risk-return factors inherent in the financial instrument. This model is regularly stress tested and back tested for appropriateness.

The Group has an established control framework with respect to the measurement of fair values. This framework includes a committee consisting of Chief Executive Officer, the Head of Trading, the Head of Credit and the Chief Financial Officer who have overall responsibility for verifying the results of trading and investment operations and all significant fair value measurements. Significant valuation issues are reported to the Board of Directors for approval and to the Board Risk Committee of the parent company, FIMBank plc for consolidation.

Due to the unobservable nature of the assumptions used, in particular the discount rate, the valuation methodology is considered level 3 as per IFRS 13 classification.

Notes to the financial statements (continued)

19. Fair values of financial instruments (continued)

Interest rate future contracts

In the case of future contracts, broker quotes are used. These quotes relate to inputs on market related data at the reporting date. The data is compiled from the CME Globex trading platform.

Interest rates used for determining fair value

The Group and Company use the Risk Free Rates (RFRs) yield curve as of 31 December plus an adequate credit margin spread to discount forfaiting assets held for trading. The discount rates used are as follows:

	2025	2024
Forfaiting assets held for trading	4.09%-29.44%	5.39%-13.57%

Where forfaiting assets held for trading are not determined by interest rates, the fair value is derived from a percentage amount on the outstanding net book value as at the reporting date, which represents management's best estimate of the recoverable amount.

The effect of a general one percent increase in the credit margin would reduce the Group and Company's profit before tax by approximately USD 3,931,810 (2024: USD 2,047,678).

Reconciliation of forfaiting assets held for trading

The following table shows a reconciliation of the movement of the forfaiting assets held for trading (Level 3 assets) from the beginning balances to the ending balances for the period ending 31 December 2025.

Group and Company

	2025 USD	2024 USD
Balance at 1 January	274,733,298	374,177,108
Purchases	906,540,975	869,120,797
Settlements	(754,209,044)	(962,559,397)
Fair valuation adjustments	4,519,333	1,537,849
Movement in accrued interest	1,595,877	(1,209,809)
Exchange differences	17,200,412	(6,517,699)
Overdue during the year	-	184,449
Overdue and settled	(1,162,841)	-
Assets written off	(4,421,608)	-
Balance at 31 December	444,796,402	274,733,298

During the year, the Group and Company did not have any Forfaiting assets held for trading that contractually matured but were not settled as at the reporting date, (2024: USD 184,449).

Notes to the financial statements (continued)

19. Fair values of financial instruments (continued)

Financial instruments not measured at fair value

The following table sets out the fair values of financial instruments not measured at fair value and analyses them by the level in the fair value hierarchy into which each fair value measurement is categorised.

2025 Group	Level 1	Level 2	Level 3	Total fair values	Total carrying amount

Trade and other payables	-	2,794,627	-	2,794,627	2,794,627

Where available, the fair value of cash and cash equivalents is based on observable market transactions.

Notes to the financial statements (continued)

20. Financial instruments

The Group and Company's business is presently focused on trading in forfaiting assets and comprises the acquisition and sale/maturity of a variety of commercial papers. In the normal course of business, the Company is exposed to the following risks:

- Market risk
- Liquidity risk
- Credit risk and
- Operational risk

The Group and Company's portfolio of forfaiting assets held for trading comprises bills of exchange, promissory notes, loans credit default swaps as well as transferable trade related loans that albeit not exchange traded, exist within an active and well-established secondary market. The Group and Company is consequently exposed to various types of risk that are associated with forfaiting assets held for trading, their funding components, and the geographical region within which it operates. The most important are market, credit and liquidity risks.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board in conjunction with the Board Risk Committee of the parent company, FIMBank plc, has established risk management policies which are responsible for developing and monitoring of all risk to the Group.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations. The Group's risk management is monitored by the Risk Management Department and reported to the Board of Directors.

The nature and extent of the financial instruments outstanding at the reporting date and the risk management policies employed by the Group and Company are discussed below.

Notes to the financial statements (continued)

20. Financial instruments (continued)

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments and comprises price risk, currency risk and interest rate risk.

The Group and Company's strategy on the management of risk, to which it is exposed as a result of its trading activities, is driven by the Board's objective to grow the size and increase the turnover of its forfaiting portfolio which necessarily requires an increase in the Group and Company's funding sources.

The Group and Company's market risk is managed on a daily basis. The decision to sell assets prior to or to hold until maturity depends on the Group and Company's liquidity, profit opportunity and trading alternatives available at the time. Portfolio management in this respect is the critical process of trading in forfaiting assets. The Group and Company has a diversified portfolio of forfaiting assets held for trading concentrating in different regions and different types of counterparties, shown in the tables below.

Market risk – Price risk

Price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual forfaiting asset, the debtor or all factors (e.g. political or commercial) affecting the forfaiting assets traded on the market. As against marketable securities, price risk is considered to be a less relevant variable in relation to forfaiting assets held for trading. Notwithstanding this, the Group and Company endeavours to mitigate any price risk by building a diversified forfaiting portfolio with an ultimately different geographical exposure.

As the majority of the Group and Company's financial assets are carried at fair value with changes through the income statement, any changes in market conditions will directly affect the Group and Company's results.

Forfaiting assets held for trading

Region	2025 USD	2024 USD
Americas	122,133,578	34,100,039

Notes to the financial statements (continued)

20. Financial instruments (continued)

Market risk – Currency risk The Group and Company trades in financial assets (represented by forfaiting assets held for trading) that are denominated, to a certain extent, in currencies other than US Dollars. The Group's policy is to hedge currency exposure that has a significant impact on its equity, which is mainly through the managing of its multi-currency loan facility. The Group and Company's total net exposure in foreign currency exchange rates at the reporting date were as follows:

Group	2025					2024				
	USD	Euro USD	Sterling USD	Other USD	Total USD	USD	Euro USD	Sterling USD	Other USD	Total USD
Assets										
- Forfaiting assets held for trading	283,559,180	161,166,659	70,563	-	444,796,402	163,208,779	111,158,975	365,544	-	274,733,298

Notes to the financial statements (continued)

20. Financial instruments (continued)

Market risk - Currency risk (continued)

A 10 percent strengthening of the US Dollar against the other currencies as at 31 December 2025 would have impacted equity and the profit by USD 52,422 loss (2024: USD 93,819 loss). This analysis assumes that all other variables, in particular interest rates remain constant. The analysis is performed on the same basis as for 2024. A 10 percent weakening of the US Dollars would give rise to an equal and opposite effect.

Market risk - Interest rate risk

The Group and Company are largely funded through equity and short-term debt from its parent at rates linked to the Official Risk Free Rates (RFRs). The Group and Company are not exposed to changes in the fair value of its liabilities as a result of changes in interest rates. On the other hand, the forfaiting market very often requires fixed rate pricing which exposes the Group and Company to the interest rate risk. In this respect, the Group and Company sells interest rate future contracts dated on or near the maturity dates of the forfaiting assets held for trading when it commits to acquire fixed rate forfaiting assets held for trading. In the event of a decision to dispose of the forfaiting asset held for trading and the related future contract before its maturity, the Group and Company have the means to buy equivalent interest rate futures with a minimum of cost.

The interest rate futures contracts are measured at fair value through the profit or loss. The net fair value adjustment of the interest rate futures at 31 December 2025 was a profit of USD 15,986 (2024: USD 62,975 profit). These amounts are recognised as fair valuation of derivative financial instruments in Trading Income.

In managing the interest rate risk, the Group and Company aims to reduce the impact of short-term fluctuations on the Group and Company's earnings. The Group and Company enter into interest rate futures contracts, to hedge against the risk of changes in the fair value of its trading assets resulting from changes in interest rates, for its forfaiting assets with an average life of more than twelve months. The effect of an estimated general increase of one percentage point in interest rate on trading assets with an average life of more than six months as at 31 December 2025 would decrease the Group and Company's profit before tax by approximately USD 1,520,099 (2024: increase Group and Company's profit before tax by USD 181,981).

Liquidity risk

As already stated above under Interest Rate Risk, the Group and Company are funded through equity capital, a multi-currency overdraft facility from the parent with a limit of USD 400 million and external borrowings. In this regard, the Group and Company's liquidity risks are limited in view of the marketability of the forfaiting assets held for trading and the availability of credit lines from the parent.

The daily liquidity position is monitored and regular liquidity stress testing is conducted under a variety of scenarios covering both normal and more severe market conditions. All liquidity policies and procedures are subject to review and approval by LFC's management. Daily reports cover the liquidity position of both the Group and operating subsidiaries and foreign branches. A summary report, including any exceptions and remedial action taken is regularly submitted to management.

Notes to the financial statements (continued)

20. Financial instruments (continued)

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to the financial instrument fails to meet its contractual obligations and arises principally from the Group's receivables from customers and investment securities.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry, country and region in which customers operate. Details of credit risk concentration of the forfaiting portfolio are included in page 39.

The risk management committee has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes external ratings, if they are available, financial statements, credit agency information, industry information, and in some cases bank references. Limits are established for each customer and reviewed quarterly. Any exposures exceeding those limits require approval from the risk management committee.

In monitoring customer credit risk, customers are grouped according to their credit characteristics, including whether they are an individual or a legal entity, whether they are a wholesale, retail or end-user customer, their geographic location, industry, trade history with the Group and existence of previous financial difficulties.

The Group is closely monitoring the economic environment in the emerging market and is taking actions to limit its exposure to customers in countries experiencing particular economic volatility.

Whilst the Company's maximum exposure to credit risk is the carrying value of the fair value of its assets and off-balance sheet instruments, the exposure is mitigated through offsetting collateral, credit guarantees and other actions taken to mitigate the Company's exposure.

Group and Company

The aging of Forfaiting assets held for trading at the balance sheet date was:

	Gross Value 2025 USD	Fair Value 2025 USD	Gross Value 2024 USD	Fair Value 2024 USD
Not past due	452,472,079	444,796,402	276,143,589	274,463,298
Past due [0-30 days]	-	-	-	-
Past due [31-120 days]	-	-	-	-
More than 120 days	6,400,000	-	11,800,000	270,000
Total	458,872,079	444,796,402	287,943,589	274,733,298

The movement in the fair valuation in respect of forfaiting assets held for trading during the year was as follows:

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Realised upward fair valuation	5,145,182	2,980,541	5,145,182	2,980,541
Realised downward fair valuation	(27,565)	(1,736,213)	(27,565)	(1,736,213)
Unrealised upward fair valuation	775,595	583,184	775,595	583,184
Unrealised downward fair valuation	(1,373,879)	(289,663)	(1,373,879)	(289,663)
	4,519,333	1,537,849	4,519,333	1,537,849

There are no historic forfaiting assets, not carried at fair value which are fully provided for.

Operational risks

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations. Operational risks include Compliance (KYC) risks, reputational risk amongst others.

The Company has an Operational Risk Management Committee to identify, monitor and assess operational risk. The committee includes the Chief Executive Officer, Deputy Chief Executive Officer, Chief Financial Officer, Head of Operations, Head of Credit, Head of Trading and the MLRO.

Reputational Risks

Reputational risk is the risk that negative publicity on LFC's business practices, whether true or not, will cause a decline in the customer base, involve the company in costly litigation, or lead to revenue reductions.

Reputational risk arises from operational failures, failure to comply with relevant laws and regulations - including but not limited to Anti-Money Laundering ("AML") and Counter Funding of Terrorism ("CFT") regulations - or from other sources, including acts or omissions of misconduct on the part of its directors and/or officers and/or representatives, even in matters which are unrelated to their mandate or position within LFC. The impact for non-compliance with the applicable regulations can be substantial and can include formal enforcement actions, monetary penalties, informal enforcement actions, and enhanced supervisory monitoring.

To this purpose, detailed AML, CFT and fraud documentation policies and procedures, a robust Business Risk Assessment and Customer Acceptance Policy as well as a strong oversight by LFC's Board and management have been devised. These are constantly maintained to reflect the latest changes in legislations and related guidance. These were updated to comply with the fourth AML directive in 2017, further updates will be undertaken to comply with changes in legislation as they occur. LFC uses qualitative research tools to assess the adequacy of prospective clients and transactions as well as rating of corporate and business relationships. Through such rigid procedures, LFC would be able to identify transactions and clients which pose a higher risk compared to others. These include Politically Exposed Persons and clients and transactions deriving from non-compliant jurisdictions. In addition, reputational risk is also indirectly mitigated through the setting of country limits. Some of the criteria used in setting up a transaction limit for particular countries are closely related to reputational risk, including issues relating to the political environment such as the fairness and frequency of election processes and access to power and effectiveness in reforming political systems and implementing economic agendas.

LFC has installed adequate internal monitoring systems to discover any such irregularities on the part of persons who may cause such risk, thus ensuring that persons not maintaining the highest standards of integrity in their activities, even if such activities are unrelated to their position, are not allowed to retain their positions of responsibility within the company.

Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Capital consists of share capital and retained earnings. The Board of Directors monitors the return on capital, which the Group defines as profit after tax divided by capital, represented by the shareholder's equity.

	Group		Company	
	2025	2024	2025	2024
	USD	USD	USD	USD
Net Profit	4,773,142	8,241,152	4,700,464	8,200,553
Total Equity	84,484,707	79,711,565	84,412,869	79,712,405
Net Profit / Total Equity	5.6%	10.3%	5.6%	10.3%

Notes to the financial statements (continued)

20. Financial instruments (continued)

The Board seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position. There were no changes in the Group's approach to capital management during the year.

21. Lease Liability

Leases as lessee

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
As at 1 January	1,606,730	811,308	1,104,725	173,793
Additions	-	1,239,486	-	1,239,486
Interest expense	87,688	59,837	61,469	25,179
Payments	(338,934)	(430,509)	(166,686)	(260,341)
Exchange differences	77,760	(73,392)	77,760	(73,392)
Balance at 31 December	1,433,244	1,606,730	1,077,268	1,104,725

As at 31 December 2025, the Group had 5 property leases (2024: 6 property leases). Of these 5 leases, 2 of them relate to ROU leases (2024: 2 ROU leases) and 3 of the leases (2024: 4) term is less than twelve months and therefore considered short-term leases. The expenses in FY25 relating to these short-term leases is USD 45,671 (2024: USD 78,742). The Group and Company has fixed payment leases and there are no variable lease payments. The Group and Company does not have any extension option on short term leases.

Non-cancellable leases are payable as follows:

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Less than one year	443,648	248,554	286,392	102,526
Between one and five years	989,596	1,358,176	790,876	1,002,199
More than five year	-	-	-	-
	1,433,244	1,606,730	1,077,268	1,104,725

The prior year amounts have been represented in order to enhance the disclosure. The Group does not have any leases as lessor.

22. Commitments and contingencies

As part of its normal trade finance activity, the Group has entered into various confirmed credits and commitments, both of which are contingent upon the fulfilment of documentary conditions on the part of its customers. As at 31 December 2025 these totalled USD 11,894,054 (2024: USD 20,575,730) for both the Group and the Company as shown in the table below:

	Group	
	2025 USD	2024 USD
Forfaiting assets held for trading commitments	11,894,054	20,575,730
Letter of Credit confirmations	-	-
Conditional guarantees	-	-
	11,894,054	20,575,730

Notes to the financial statements (continued)

22. Commitments and contingencies (continued)

Financial Guarantees

Financial guarantees are recognised under IFRS 9 and are held at fair value in the statements of financial position. The nature of these guarantees means that fair value at inception is usually equal to the premium received. If there is no up-front payment then the fair value of the financial guarantees is recognised at nil on the statements of financial position.

23. Related parties

Identity of related parties and related party balances

Income Statement	Related party	Group and Company	
		2025 USD	2024 USD
Forfaiting yield	United Gulf Holding Company Bsc	469,616	768,552
	Jordan Kuwait Bank	-	1,801

23. Related parties (continued)

Directors' remuneration

The total amounts for Directors' remuneration were as follows:

	Group		Company	
	2025 USD	2024 USD	2025 USD	2024 USD
Directors' Remuneration	1,185,465	366,223	1,185,465	366,223
Company contributions to money purchase pension plans	-	-	-	-
	1,185,465	366,223	1,185,465	366,223

The aggregate of emoluments and amounts receivable for the highest paid Director is USD 1,140,465 (2024: USD 339,556). The directors of LFC include employees of other KIPCO group companies whose remuneration is borne by these companies and similarly, there are employees remunerated by the Company who act as directors of other companies in the FIMBank plc's group. For those directors that are compensated by the Company, the total compensation for the period they were directors has been allocated.

Key management personnel

Key management personnel are those people having authority and responsibility for planning, directing, and controlling the activities of an entity, either directly or indirectly. The total payments received by key management personnel from the Group and the Company were:

	2025 USD	2024 USD
Short-term employee benefits	1,724,651	1,652,849
Post-employment benefits	336,255	285,168
Other long-term benefits	-	-
Termination benefits	-	-
	2,060,906	1,938,017

Other than consideration paid for the provision of services under contracts of employment or in their capacity as directors of the Company, the Company did not have other related party transactions with key management.

24. Subsequent events

The Company has evaluated the potential impact of the ongoing Gulf crisis on its operations and financial position. Management has determined that the impact is not significant at this time and will continue to monitor the situation going forward.

No adjustments to the financial statements are required as a result of this, and it is not anticipated to have a significant effect on future operations or financial stability.
